The Ranch Malibu Skincare

You can now enjoy the luxuries of visiting [The Ranch Malibu](#) – a Hollywood favorite locale for honoring individual beauty through detox, personal growth and inspiration – via their recently-launched skincare line.

Heather Bradley of [Bradley Beauty](#) in Brentwood Village (a.k.a. the best facial in town) has collaborated with The Ranch to create a line of organic beauty products that are unique, small-batched and handmade from products grown directly on their farms.

We particularly love the [Sun Soaked Sage](#), a facial and body mist, perfect for pre-sunscreen and foundation to purify the skin before application. It also serves as a lovely way to freshen up your surroundings, due to the healing properties of its primary ingredient, sage.

Their [Bee's Milk Facial Scrub](#) is another favorite, perfectly formulated with honey, lemon and fine-grain sugar to create a perfect skin brightener with pore-reducing qualities.

You can find all products on The Ranch website, as well as on Violet Grey.
